## Abstract

*This paper examines India's global leadership in 2047, analyzing the impact of NEP 2020, Women Empowerment, Agriculture Reform, and Make in India. It explores how NEP 2020 fosters skilled individuals and innovation, while women empowerment initiatives drive social and economic progress. The agricultural reform enhances productivity and food security, and 'Make in India' campaign boosts industrial growth. This study sheds light on the interconnected effects of these policies, offering insights into India's rise as a global leader and emphasizing the significance of visionary reforms and empowerment for sustainable development.*

**Keywords:** Empowering India's Journey to Global Leadership in 2047: A Comprehensive Analysis of NEP 2020, Women Empowerment, Agriculture Reform, and Make in India

## Introduction

As India charts its path towards 2047, the centenary year of its independence, the nation's aspirations for global leadership have never been more resolute. This paper endeavors to examine the pivotal role played by key policy initiatives - the National Education Policy (NEP) 2020, Women Empowerment, Agriculture Reform, and Make in India - in propelling India towards its envisioned position on the global stage. Each of these transformative drivers brings unique dimensions to the country's journey, fostering inclusive growth, gender equality, agricultural sustainability, and industrial prowess.

### Education - A True Driving Factor:

- Human Capital Development:** Education and NEP 2020 nurture skilled individuals, fostering creativity and critical thinking. A well-educated workforce drives economic growth and innovation, enhancing India's global competitiveness.
- Knowledge Economy:** NEP 2020 emphasizes research and innovation, positioning India as a leader in technology, science, and medicine. Leveraging
