Abstract

This article investigates the processes of Learning From several countries Successful Digital Transformation Initiatives Around The World. In the world we have seven continents like Asia, Europe, Africa, Oceania, Latin America and the Caribbean, Northern America and Antarctica. From the above three continents we have selected three countries like Ukraine, Japan and Canada. From the three countries, were taken as an case study and found their successful best practices of digital transformation initiatives are implemented and followed. In Ukraine has become a global leader in government technology in recent years. It is the first nation in Europe to have a digital driving license and the first to have a national digital ID system. In Japan accelerates innovation, drives economic growth, and enhances the quality of life. In Canada focus on providing Canadians with higher-quality services that are more accessible while maintaining security and privacy. It is not just about technology, but also an opportunity to improve governance and services for citizens in simple its about adapting to profound social changes.

Keywords : digital transformation, case study, modernization, digital era, government initiatives.
